DC FIRE AND EMS — FIRE PREVENTION TIPS

SMOKE ALARMS SAVE LIVES

► Install smoke alarms on every level of the home including the basement.

► Test smoke alarms once a month.

► Never disable smoke alarms.

► Change your battery twice a year and replace your smoke alarms every ten years with 10-year lithium ion smoke alarms.

► If you are a homeowner and are unable to afford a smoke alarm, DC Fire and EMS will install one at no charge.

ELECTRICAL SAFETY

► Do not overload electrical circuits or outlets by plugging too many items into them.

► Replace extension cords with surge protectors.

► Never charge your cell phone or laptop on your bed.

► Space heaters and candles should have a 3-foot clearance from combustibles.

► Always clean the lint trap out of the dryer after every use.

KITCHEN SAFETY

► Never leave the kitchen while cooking. If you must leave the room use a timer to alert you when your food is ready.

► Never cook while sleepy, drinking or smoking.

► Keep pot handles turned inward and keep the stove clear of anything that can catch fire.

► If your pot catches on fire, slide a lid on top and turn the stove off. And if your oven catches fire, keep the oven door closed and turn it off.

► While using the microwave never leave it unattended.

DC FIRE AND EMS – FIRE PREVENTION TIPS

SMOKING SAFETY

► Never smoke in bed or when you are sleepy.

► Do not leave lit cigarettes and smoking devices unattended.

► Avoid drinking while smoking. The combination can be dangerous.

► If friends who smoke visit, have them smoke outside to avoid a fire.

► Do not discard smoking materials by dropping them in the grass, mulch or on the ground.

FIRE EVACUATION

► Discuss and create a Fire Escape Plan with your family. Include a meeting place on your plan.

► When renting, make sure the bedroom has a window and door. Most fires happen at night, the door can protect you from smoke and fire and the window is a second way to escape.

► During a fire, smoke rises. Stay as low as possible while getting out.

► In the event of a fire, escape first then call 911. Don’t go back into your home for anything.
